IN THE CLAIMS

Please cancel claim 2 without prejudice.

Please amend claims 1 and 3 and renumbered claims 28 - 31, 33, 34,
36, 37 and 42 as follows:

1. (Amended) A light fixture for illuminating a surface, comprising:
a base for housing a light producing source;
a convex lens covering at least a portion of said base;
a plate disposed within said base; and
a plurality of light reflecting fins affixed to said plate and projecting from
said plate in a direction away from said plate.

2. (Amended) The light fixture according to claim [2] 1, wherein said fixture
includes a frame moveably connected to said base, said lens being fixed to said
frame.

27 28. (Amended) The light fixture according to claim [28] 27, wherein said
third one of said plurality of light reflecting fins fin is generally rectangular in
shape.

29. (Amended) The light fixture according to claim [28] 27, wherein said
third one of said plurality of light reflecting fins is disposed at a 45° angle to a
plane bisecting said front light reflecting element and said rear light reflecting
element.

²⁹
30. (Amended) The light fixture according to claim [27] ²⁵~~26~~, wherein said third one of said plurality of light reflecting fins includes a flange, said flange being fixed to said plate.

Q3 ³⁰
31. (Amended) The light fixture according to claim [27] ²⁵~~26~~, wherein said third one of said plurality of light reflecting fins includes an edge, said edge extending laterally to said second one of said plurality of light reflecting fins.

Q4 ³²
33. (Amended) The light fixture according to claim [33] ³¹~~32~~, wherein said light reflecting plate includes a flange, said flange being fixed to said plate.

Q4 ³³
34. (Amended) The light fixture according to claim [33] ³²~~32~~, wherein said light reflecting plate includes a first surface disposed at approximately 45° to the surface of said plate, being canted away therefrom.

Q5 ³⁵
36. (Amended) The light fixture according to claim [36] ³⁴~~36~~, wherein said front reflective element includes a reflective surface disposed at about a 45° angle to said plate, said surface angling outwardly away from a line bisecting said base, said front reflective element further including a perpendicular wall.

Q5 ³⁶
37. (Amended) The light fixture according to claim [37] ³⁵~~36~~, wherein said perpendicular wall includes a flange, said flange being fixed to said plate.

Q6 ⁴¹
42. (Amended) The light fixture according to claim [42] ⁴⁰~~41~~, wherein said pair of sidewalls, said front wall and said bottom wall define a space within said base, said base being suitable for disposition therewithin of the lamp ballast means.
